DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- a. Group I, claim(s) 1-24, 40, 44, 43 and 48-71, drawn to a drainage device comprising a first component, second component and elongated tubular mesh, and method of using.
- b. Group II, claim(s) 25-39,41,42,45-47 and 72-91, drawn to another drainage device comprising a first component, second component and elongated tubular mesh, and another method of using.

The following claim(s) are generic: currently, no claims are generic.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 3761

3. Where the group of inventions is claimed in one and the same international application, the requirement for unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among the inventions involving one or more of the same or corresponding special technical features. The expression “special technical features” shall mean those technical features that define a contribution which each of the claimed inventions considered as a whole, makes over the prior art. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT rule 13.1 because, under PCT Rule 13.2, although they share the special technical feature, this special technical feature does not define a contribution over the prior art for the following reasons:

The common technical feature of a first component comprising a distal segment, where the distal segment comprises an elongated tubular mesh as claimed [claims 1 and 25], or a tubular mesh as claimed [claim 48] is known in the art. For example, Driskill (US Patent 6,517,551) discloses an intravascular foreign object retrieval catheter (cols. 3-4, lines 59-5), further comprising:

a first component comprising a distal segment (col. 5, lines 4-11, Fig. 1, second basket catheter 14 having distal segment);

where the distal segment comprises an elongated tubular mesh (col. 5, lines 20-24, Fig. 1, second basket catheter 14 connected to containment basket 30). The shared technical feature of an elongated tubular mesh does not provide a contribution over the prior art, and no single general inventive concept exists. Therefore the restriction is appropriate.

4. A telephone call was made to David A. Farah on 18 August 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.142) and (ii) identification of the claims encompassing the elected invention.

6. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

7. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 73 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Adam Marcetich whose telephone number is (571)272-2590. The examiner can normally be reached on 8:00am to 4:00pm Monday through Friday.
